

## iCar 2 BT/WIFI Quick Start

Dear friends when you got this exquisite device please do the operations as following.

### First Steps:

Install related software to your mobile-phone, if you mobile-phone using android system then please download the TORQUE from Android Market, if you mobile-phone is Apple phone (Or iPad) then please download Dashcommand from APP Store. After install the related software to your mobile-phone then all is finished. Of course you also can use the TORQUE and Dashcommand software from the CD of the device which we supplied to you. Please Referencing the following pictures.

Android

IOS

### Second Steps:

Connect the bought Icar2 to your Car OBD interface, you can find the light of the icar2 will flash (it shows the the connection is good), then it coming in standby and waiting for working. Usually the CAR OBD interface were under the steering wheel (above of the brake), some are hided in the tool box of the hand brake, you can reference the following picture to find it.

### NOTE!!!the switching function of icar2:

don't need to draw the Icar2 after the car stall (but still have power supply) ,30 minutes later it will automatically come to sleep mode and stay in power saving condition. Tomorrow morning or next time to start the vehicle you can use the Icar2 directly only by press the switch not need do plug again, you don't needed to make mobile-phone connection again, it can connect to it automatically.
